PUMA GT2600M

PUMA GT series

PUMA GT Series is an 8/10/12-inch grade turning center suggesting new global standards. The series is equipped with the most powerful spindle in its class and the tool post of the next-generation concept to guarantee powerful and precise cutting capability and exceptional productivity. The design of PUMA GT Series focuses on convenient operation and easy maintenance

Sample

Powerful/Precise Cutting Capability

PUMA GT Series realizes stable and powerful cutting capabilities by adopting the box guideway structure and the highest spindle power in its class.

Powerful/Precise Cutting Capability

Comparing to the previous models, faster repaid traverse and optimal control function ensure the highest productivity.

Improved Usability

Usability of PUMA GT Series is maximized with user-friendly operation panel, and simple maintenance functions.

Basic Structure

Box guideways are applied to all axes to prevent vibration, secure dynamic rigidity, and ensure powerful and precise machining.

Diverse Line-up Fully Satisfying Demands of Customers

PUMA GT Series provides 14 line-ups, of which configuration varies depending on the standard chuck size, the length of machine, and operation of rotating tools.

Model group	Standard chuck size (inch)			Function
		std.	L	
PUMA GT2100	8	550 (21.7)	-	2 axis/M
PUMA GT2100B	10	550 (21.7)	-	2 axis/M
PUMA GT2600	10	650 (25.6)	1050 (41.3)	2 axis/M
PUMA GT3100	12	750 (29.5)	1250 (47.4)	2 axis/M

Model group	Travel (mm(inch))		Rapid traverse rate (m/min(ipm))	
	X-Axis	Z-Axis	X-Axis	Z-Axis
PUMA GT2100	230 (9.1)	580 (22.8)	24 (945)	30 (1181)
PUMA GT2100B				
PUMA GT2600	265 (10.4)	680 (26.8)		
PUMA GT2600L		1100 (43.3)		
PUMA GT3100	260 (10.2)	830 (32.7)		
PUMA GT3100L		1350 (53.1)		

Machining Area

PUMA GT Series forms the largest machining area in its class to yield the maximum productivity with the minimum costs.

Model group (unit : mm(inch))	Max. turning dia. (2axis/M)	Bar working dia.	Max. turning length (2axis/M)
PUMA GT2100	390 / 300 (15.4 / 11.8)	65 (2.6)	562 / 513 (22.1 / 20.2)
PUMA GT2100B			550 / 501 (21.7 / 19.7)
PUMA GT2600	460 / 410 (18.1 / 16.1)	81 (3.2)	658 / 610 (25.9 / 24.0)
PUMA GT2600L			1078 / 1030 (42.4 / 40.6)
PUMA GT3100	481 / 376 (18.9 / 14.8)	102	755 / 725 (29.7 / 28.5)
PUMA GT3100L			1275 / 1245 (50.2 / 49.0)

Spindle

Customer Support Service

Rotation of the turret is controlled by the servo motor for prompt and correct selection of tools.

Servo indexing turret

The servo motor controls rotation of the turret for the purpose of guaranteeing rapid rotation and correct position. The milling turret including rotary tools features a BMT type of design for higher rigidity. In addition, the minimization of thermal error due to oil and air lubrication of the rotary tools delivers the best milling, drilling and tapping performance in its class.

Chip conveyor option 26

The conveyor provides a superior chip removal system and is designed with a stable structure for easy maintenance and reduced leakage. By selecting the correct type of conveyor, the efficiency of the machine working area is increased.

Chip conveyor type	Material	Description
Hinged belt	Steel	Most typical type of chip conveyor. Appropriate for steel materials generating chips of length of 30 mm or more.
Screw	Steel	Chip conveyor with smallest footprint. Demands 80% of footprint comparing to hinged belt.
Magnetic scrapper	Cast iron	Chip conveyor with magnet equipped : Appropriate for cast iron workpieces generating fine chips

Easy-to-clean coolant tank

The coolant tank can be dismantled without disassembling the chip conveyor. Operating convenience is significantly enhanced.

Model group	Coolant tank capacity (L (gallon))
PUMA GT2100 [B]	190 [190] (50.2 [50.2])
PUMA GT2600 [L]	220 [268] (58.1 [70.8])
PUMA GT3100 [L]	235 [275] (62.1 [72.7])

1.
Axis - tool number display
(only for PUMA GT3100)

Axis and tool number display in machine ensures the selected axis just before turning MPG during handle mode and to make it easier to see the number of the tool at working position

2.
Tool setter
(Tool length measurement)
option 32, 33

The tool setter facilitates setting of tools, and fast and precise length compensation of abraded tool.

3.
Full sliding cover on tailstock guideway

Application of a full cover is to prevent the heat of chips from being transferred to the bed and guideway. The tailstock guideway can be protected and chips can be removed easily.

Oil skimmer **option 20**

The oil skimmer keeps coolant and lubricant isolated from each other for extending lifecycle of coolant.

Coolant chiller **option 21**

Detachable coolant chiller is recommended to keep thermal error minimal and get higher machining precision.

Part catcher **option 34**

The part catcher automatically accepts parts completed machining, and ejects them out of the system.

Mist collector **option 31**

The mist collector absorbs airborne oil vapor and fine dusts in the system to improve working environment.

Collet chuck **option**

The collet chuck is ideal for loading workpiece of small diameter and light weight

Linear scale (X axis/Z axis) **option 39**

Linear scale is available to all axes for high accuracy.

Customer Support Service

Apply Fanuc CNC on the Doosan machine to fulfill best performance and productivity

User-friendly OP Panel

The operation panel of new design enhances operating convenience by common buttons and positioning, and uses qwerty type keyboard for easy and fast operation.

Easy Operation Package

Doosan Easy Operation Package (EOP) supports the user with tool, help desk, operation, functionalities to maximize operational efficiency and user convenience.

Improve Productivity

Reduced non-cutting cycle time
10%

Non-cutting time during machining process is dramatically reduced to guarantee the highest productivity.

Operation / Maintenance

Tool load monitoring **option**

During cutting operation, abnormal load caused by wear or damage of the tool is detected and an alarm is triggered to prevent further damage.

Turret recovery help

The software is to help users recover turret step by step from trouble situation where it does not work. It can quickly recover your valuable machine.

Work management

The function is capable of checking operation hours of the system, and quantity of finished workpieces.

Responding to Customers Anytime, Anywhere

Doosan Machine Tools' Global Network, Responding to Customer's Needs nearby, Anytime, Anywhere

Doosan machine tools provides a system-based professional support service before and after the machine tool sale by responding quickly and efficiently to customers' demands.

By supplying spare parts, product training, field service and technical support, we can provide top class support to our customers around the world.

Customer Support Service

We help customers to achieve success by providing a variety of professional services from pre-sales consultancy to post-sales support.

Supplying Parts

- Supplying a wide range of original Doosan spare parts
- Parts repair service

Field Services

- On site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair

Technical Support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy

Training

- Programming / machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering
